EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 1, line 1, delete the "a" after the word anastomosing.

2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or render obvious the overall claimed invention of a compression plate anastomosis apparatus for anastomosing an end of a graft vessel to a side of a receiving vessel together, comprising: a first compression plat opening has a perimeter defined by first holding means; the first holding means is shaped to hold receiving vessel portion in a configuration such that when the receiving vessel portion and the graft vessel portion are anastomosed together there is an uneven distribution of force against the receiving vessel portion around the receiving vessel opening caused by the shape of the first holding means and due to the inability of the second holding means to fully extend into any spaces of the first holding means. The prior art to Takaro fails to specifically teach wherein the first compression plate, the second compression plate and the locking means are configured to cooperate together to anastomose the end of the graft vessel to the side of the receiving vessel with the receiving and graft vessel portions held directly between the first and second holding means or wherein the

Art Unit: 3734

apparatus is configured to remain in one's body after the end of the graft vessel is anastomosed to the side of the receiving vessel.

3. Claims 1, 18, and 29 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 8, 14, 17, 28, and 37 are directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement as set forth in the Office action mailed on 10 February 2003 is hereby withdrawn. In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claims including all the limitations of an allowable product claim or rejoined process claim are presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
